Our Journey

1998

In 1998, inception of ESSEL by three young minds. With the aim to deliver quality and design.

2000

In 2000, developed the EURO range, by understanding the demands for aesthetics and functionality.

2002

Adopted the early trend of quarter-turn faucets setting a benchmark in the industry the new designs.

2005

In 2005, introduced concealed diverters for the new age customers.

2018

Instituted sanitaryware division to complete bathroom solutions.

2017

In 2017, commencement of Derabassi Plant, equipped with water harvesting, watershed management system, electrostatic dust collecting system for blast furnace, grinding and polishing machines.

2013

In 2013, an expansion of manufacturing facility to Derabassi, Punjab; met the ever rising demand for ESSEL products. The aim was to develop India's finest, cleanest, ecologically sustainable, faucet manufacturing plant.

2007

Conceptualized concealed flush valves with an internal brass piston, faucets setting a benchmark in the industry with the new designs.

2020

In 2020, contrivance of hands-free vanities and foot operative taps; zero contact wall-mounted sensors as our corporate social responsibility to enable INDIA to fight the covid pandemic.

2021

Elevated our commitment to a carbon neutral future with the installation of 260 KWH solar panels and hazardous waste management systems.

Present

In 2022, inducted auto-polishing robots for elevated quality levels. We delivers innovative, high-quality bath solutions and continues to grow as a trusted industry leader.

ESSEL

FAUCETS

Essel faucets blend modern design with superior functionality, offering a wide range of options for both bathrooms and kitchens. Crafted from high-quality materials like brass and stainless steel, these faucets are durable, corrosion-resistant, and available in various stylish finishes such as Chrome, French Gold, and Rose Gold. Whether it's basin mixers, health faucets, or touchless sensor models, Essel ensures each faucet delivers a perfect balance of elegance, innovation, and reliability for everyday use.

A woman and a young girl are smiling and washing dishes in a modern kitchen sink. The woman is wearing a light blue apron over a white shirt, and the girl is wearing a white shirt and a blue apron. They are standing at a granite countertop. The sink is a double-basin stainless steel sink with a modern, high-arc chrome faucet. Water is flowing from the faucet into the left basin. The background features white subway tile backsplash, a stainless steel range hood, and wooden cabinets. A potted plant and a knife block are on the countertop to the right.

ESSEL

KITCHEN SINKS & SINK MIXERS

Essel Bathfittings offers a stylish and durable range of kitchen and sink mixers. Crafted from high-quality brass with elegant chrome finishes, their mixers combine modern design with practical functionality. From wall-mounted to deck-mounted models, Essel provides options like high-spout and pull-out mixers to suit various kitchen needs, ensuring smooth water flow and easy temperature control.

A white toilet is positioned on a small, circular patch of green grass. The background is a dark, moody landscape with jagged, rocky formations under a dark sky. The overall aesthetic is modern and minimalist.

ESSEL

Bathroom Fixtures

Essel offers an exquisite range of sanitary ware, featuring modern toilets, washbasins, bidets, and other essential bathroom fixtures. Designed with both style and practicality in mind, Essel's sanitary ware is crafted from high-quality materials to ensure durability and easy maintenance. With sleek designs and water-efficient features, Essel provides the perfect balance of functionality and aesthetics, making it an ideal choice for creating a contemporary and comfortable bathroom space.

ESSEL

Inbuilt Jet

Essel's sanitaryware comes with a seamlessly inbuilt jet feature — a rare innovation in the industry. Designed for enhanced hygiene and minimalist aesthetics, it removes the need for external jet sprays.

Consumer Guidelines for Faucets:-

In Our constant endeavor to provide innovative and technically excellent products to our customers and to ensure optimum & trouble free performance of ESSEL products for Years, we have evolved a set of consumer guidelines, these guidelines will ensure that you get the best out of your product.

1. Kindly carefully check the products before installation.
2. ESSEL is not liable or shall not be responsible for any such damage/scratch or for improper installation.
3. The installation should be done by trained technician.
4. Water Scaling- Due to presence of minerals and salt in water, scaling is formed on the product if it is not cleaned regularly. The products should be cleaned gently at regular intervals. Also, take extra care to clean the edges and corners of the products because these areas are more vulnerable for scale settling.
5. Clean the aerators from time to time for a perfect foam flow of water from the faucet. The property of water being used is very important for your plumbing installations (Pipes etc.), as well as for your own hygiene. The hardness of water should not exceed 300-400ppm.
6. Acid Fumes- During cleaning of the tiles or floors in the bathroom with cleaning agents which contain acids or chemicals, acid fumes are formed. Because the basic material used in the Faucet is brass and brass being an alloy of copper, reacts with these acid fumes. With this reaction, a green color layer / Black Spots are formed on the products resulting in damage to the outer finish or coating. It is recommended the faucets be covered with cloth before doing such floor cleaning, to protect them from acidic fumes.
7. Scratching while cleaning - Scratching or scrubbing occurs due to hard nature of cloth or coarse cleaning powder being used for cleaning. Use a gentle fluffy soft cloth for cleaning the surface.
8. Atmospheric condition - This applies mostly to salt content in the air in coastal areas, sometime the air reacts with brass and black spots emerge on the surface of product. Therefore, the product is required to be cleaned regularly. At the time of installation of these products, cover the products with the cloth covers provided in packaging or with polythene till the time you actually start using them.
9. Improper/wrong installation of the products automatically terminates and nullifies this warranty and this warranty does not cover problems arising from low water pressure, more than recommended water pressure, and wear and tear, impurities/hardness beyond the norms of drinking water or improper care and cleaning.
10. The warranty shall not be applicable, in case, if the defect is caused due to improper installation, undesirable working environments such as contaminated water, hardness of water beyond the acceptable limits of drinking water or even by improper handling. ESSEL shall repair/replace defective components (after examination by authorized technician) on either chargeable basis or free of charge, as is decided by ESSEL CARE. For better performance of the product, we recommended water pressure should be between 2.5 bar to 3 bar.
11. No. of bends in the pipeline should be kept to minimum. The water travel straight or vertical as far as possible. More numbers of bends are dropping the water pressure.
12. The 25mm pipelines should be used instead of 20 mm for better flow over a period of time when scaling reduces the diameter of pipe.
13. Supply pipe should be provided with vent pipes to prevent air locking in the pipes.
14. All concealed fittings and pipelines should be tested at high pressure before plastering.
15. Buy ESSEL products from company's authorized dealers only.

Consumer Guidelines for Sanitary Ware:-

1. Kindly inspect the products at the time of taking delivery.
2. Essel is not responsible for any damage occurred in transit and malfunctioning due to improper installation.
3. While cleaning the ceramic products after installation, please do not use any abrasive cleansers, as they may damage the ceramic surface. Use warm water and liquid detergent to clean the ceramic surface. Always test product cleaning solution on an inconspicuous area of the product before applying it to the entire surface.
4. The wash basin and water closet are heavy and it is recommended that two persons hold it while being fixed.
5. Do not use metal tools or wire brushes to remove any plaster. Use powder type detergent on a damp cloth to provide mild abrasive action to remove any residual plaster or white cement/putty. Clean the outside surface of the vitreous china product with mild soap and warm water. Wipe the entire surface completely dry with a clean, soft cloth.
6. Please do not use cement at any hollow portion and bottom of the vitreous China product may cause the Crack.

Warranty Terms and Conditions:

1. Warranty period will start from the date of purchase of the product and can only be availed if the valid proof of purchase is shown to authorize service personnel at time of repairs. And shall automatically terminate upon the Expiry of the warranty period even if the product has not been installed or not in use after purchase.
2. For all products installed beyond the municipal limits of the jurisdiction of company service center/ authorized service associate, the expenses incurred with regards to deputing the service personnel towards to & fro travel. Conveyance and other incidental will be born by customer.
3. The company is also not liable to pay for any civil or construction work required during installation of new products or replacement/repair of old products.
4. The Warranty period is not renewed or extended on supply of spare parts during the warranty. the company will be at sole discretion, repair or replace any defective components or part of the product with or without cost.
5.
